Sarim Ansari

Software Engineer at Morgan Stanley | Full-Stack Java Developer |
GenAI Expert | 7+ Years Designing Scalable Systems
Mumbai, Maharashtra, India

Summary

I'm a senior software engineer and GenAI expert designing & shipping enterprise-scale, high-performance systems for 7+ years

Expertise

- Backend Development
- Web Development
- GenAI
- System Design

Tech Stack

Java, Spring Boot, GenAI, Agentic RAG, LangChain, Angular, Snowflake, MongoDB, Redis, Kafka

Experience

Morgan Stanley

3 years 11 months

Director

January 2024 - Present (2 years 7 months)

Mumbai, Maharashtra, India

- Built a GenAI-powered self-service analytics platform using Snowflake Cortex AI, enabling natural language access to Snowflake semantic models and eliminating the need for manual SQL
- Implemented a real-time Kafka-based data pipeline, reducing data staleness from ~10 seconds to milliseconds and improving data consistency across distributed services

- Modernized 10+ legacy Research Platform services by automating large-scale code migrations using OpenRewrite, significantly reducing technical debt
- Served as Scrum Master, driving effective sprint execution and stakeholder alignment

Manager

September 2022 - January 2024 (1 year 5 months)

Mumbai, Maharashtra, India

Accolite

Senior Software Engineer

February 2020 - September 2022 (2 years 8 months)

Mumbai, Maharashtra, India

- Led the architecture and development of a scalable screening platform consolidating multiple data vendors, improving operational efficiency by 40%
- Executed a large-scale (>1TB) database migration to PostgreSQL using Amazon SCT managing schema conversion, data validation, and performance optimization
- Optimized multiple application performance using advanced profiling tools, significantly reducing latency

Infosys

1 year 9 months

System Engineer

September 2018 - February 2020 (1 year 6 months)

Pune, Maharashtra

- Built modular, reusable UI components delivering a modern and consistent user experience
- Contributed to UK Open Banking-compliant payment solutions, implementing secure and scalable payment workflows for a leading FinTech client
- Designed and implemented Spring Boot-based microservices using OpenAPI specifications, enabling scalable and standards-compliant APIs

System Engineer Trainee

June 2018 - September 2018 (4 months)

Mysore, Karnataka, India

Education

MCT's Rajiv Gandhi Institute Of Technology

Bachelor of Engineering, Information Technology · (2015 - 2018)

M. H. Saboo Siddik Polytechnic

Diploma in Engineering, Information Technology · (2012 - 2015)
