SUMMARY

Senior Software Engineer with 7+ years of experience building enterprise-scale, high-performance platforms

SKILLS

Expertise - Backend Development, GenAI, Web Development, System Design

Tech - Java, Spring Boot, Microservices, GenAI, Agentic RAG, LangChain, LLM, Angular, Snowflake, MongoDB, Redis, Apache Kafka

WORK EXPERIENCE

Morgan Stanley | Director

September, 2022 – Present

- Built a GenAI-powered self-service analytics platform using Snowflake Cortex AI, enabling business users to query Snowflake semantic models using natural language and eliminating the need for manual SQL.
- Built a real-time data synchronization pipeline using Kafka - reducing data staleness from ~10 secs to ms, improving user data consistency across distributed services.
- Modernized 10+ legacy platform services by automating large-scale code migrations using OpenRewrite
- Conducted design reviews and mentored junior engineers, driving improvements in technical documentation, code quality, and knowledge sharing.
- Served as Scrum Master, facilitating sprint planning, daily stand-ups, retrospectives, stakeholder meetings, and sprint demos.

Accolite | Senior Software Engineer

February, 2020 – September, 2022

- Led the architecture and development of a scalable screening platform consolidating multiple data vendors into a unified system, improving operational efficiency by 40%.
- Executed a large-scale (>1TB) database migration to PostgreSQL using Amazon SCT, managing schema conversion, data validation, and performance considerations.
- Drove a strategic shift to a DevOps-first operating model, improving delivery efficiency and operational reliability.
- Optimized multiple applications using advanced profiling tools, significantly reducing system latency.

Infosys | System Engineer

June, 2018 – February, 2020

- Built modular, reusable UI components delivering a modern and consistent user experience.
- Contributed to UK Open Banking-compliant payment solutions, implementing secure and scalable payment workflows for a leading FinTech client
- Designed and implemented Spring Boot-based microservices using OpenAPI specifications, enabling scalable and standards-compliant APIs

EDUCATION

Bachelor's of Engineering

2015 - 2018

- Information Technology (7.75 CGPA)
- Rajiv Gandhi Institute of Technology, Mumbai

Diploma in Engineering

2012 - 2015

- Information Technology (83.65%)
 - M. H. Saboo Siddik Polytechnic, Mumbai
-
